Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Until you can stimulate jobs in the economy, adding more taxes to people who have already lost their job and have had their wages cut in half isn't nice. You are asking for more people to file bankruptcy and more people will try to get public assistance. With your well paid jobs, you aren't seeing this. I am one of those people who lost their job and now make minimum wage. Stimulate the economy for well paid jobs with benefits before you think of raising taxes.

Thank you, Shirley C Garza

Sincerely,

Shirley Garza
